

Dear

I want to make certain that everyone performing acupuncture in Massachusetts is trained, evaluated, and licensed to do so, for the safety of myself, my community and the public in general.

Please support HB3247 and SB1182, "An Act relative to the safe treatment of pain". It requires proper training and licensure by creating a clear definition -- "Any insertion of a filiform/metal needle for therapeutic purpose into a body constitutes the practice of acupuncture."

I ask you to ensure that anyone practicing acupuncture is properly trained, assessed by a third party, and licensed to do so.

Respectfully,

Dear
